induchem

Working on anti-aging products? Designing lines for customers with mature skin? Searching for an innovative ingredient to decrease wrinkle-depth?

Introducing...

Rubixyl!

The latest **anti-aging** product launched by induchem Companies, offers a new approach to taking action against the visible signs of aging. **Rubixyl** is a **revolutionary nature-inspired bio-mimetic peptide** that binds to and activates the delta opioid receptors in the epidermis to normalize cell differentiation. In a double blind placebo controlled clinical evaluation of the efficiency of Rubixyl toward anti-wrinkle effects on 20 volunteers, **50% of them being smokers**, **Rubixyl**: significantly **reduced TEWL by 82% after 60 days, with visible effects in only 2 weeks**; Dermatologists analyzed the **skin smoothness** to be **30% higher after 60 days** of use; and in volunteers' self-evaluation, skin feeling after using a cream containing 1% **Rubixyl** versus a placebo cream was judged as **better hydrated**, having **less visible wrinkles**, and **appearing younger**.
